

Greenbank Group - Boiler Efficiency Products

Quality Reliability & Performance - The Greenbank Guarantee

- Improve *particle fineness* and milling throughput using **CoalValve** and **GravMaster** gravimetric feeders
- Manage and detect *boiler tube leaks* directly using **GA200**[®] series boiler steam leak detection system
- Monitor *combustion efficiency* directly using **G-CAM**[®] carbon-in-ash monitor
- Improve *air to fuel ratio* and PF distribution on multi-outlet mills using **CoalFlo**[®] PF balancing dampers
- Measure *PF distribution and velocity* using Greenbank's **PFMS** PF flow monitoring system
- Monitor *particle fineness* and milling Performance using **MillMaster**[®] particle size analyser
- Improve *air to fuel ratio* and PF distribution at pipe splitters using **VARB**[®] PF diffusers
- Optimising PF Stoichiometry using state-of-the-art **CFD**
