

Presenting the SG 2.1-122 onshore turbine delivering the best capacity factor in low-winds

Our latest offering, the SG 2.1-122 onshore wind turbine has been developed by combining proven technology with vast experience, to ensure reduced LCoE, irrespective of the geographical and environmental conditions. It has the largest rotor in its segment, which boosts production capacity. We reaffirm our commitment to empowering you with the world's most advanced wind energy technology, for we share your vision of powering a progressive future.
