

ZF puts wind energy in motion

Advanced wind turbine gearbox technology up to 9.5 MW power capacity, serving all key wind power segments.

ZF can look back over 100 years of experience in developing and building transmissions. Add to this more than 70 years of joint experience in wind energy (along with the former Hansen and Bosch Rexroth) and ZF Wind Power is a competent partner, supplying major manufacturers of gear-driven wind turbines. ZF is determined to be the leading supplier in geared solutions for wind turbines and is committed to succeed in making wind power the most attractive energy source in the future – to power a world in motion. **For more information visit ZF.com/windpower**
