**GUJARAT'S ONLY**  
**REFINED**  
**STEEL**  
**WITH LRF\* TECHNOLOGY**

ET TMT uses a combination of Iron Ore and Ladle Refining Furnace technology to produce the highest-quality steel that is refined to the fullest and meets the stringent Sulphur and Phosphorous BIS norms of 500 D grade. While the use of iron ore ensures tramp free steel, refining ensures low Sulphur and Phosphorous levels. This makes ET TMT 500 D grade the most preferred option for all customers seeking TMT bars for their critical infrastructure and construction projects.

**Integrated facility for Cut & Bend Bars**

- Made from world's finest machines
- No wastage of material and money
- Superior finishing with absolute accuracy
