Cement plant is a continuously running industry; it works at full capacity during night too. Engineers and Work Force are always on the job to provide un-interrupted production. Sufficient light in every part of the plant area is must for working and most important is Human safety. This adds cost to your product. While cost of energy is an area of concern, dust and heat are other major challenges due to surrounding environment of Cement plant.

Crompton LED Luminaire meets all extreme challenges of Cement Industry. Apart from energy savings about 60% over conventional, these products takes care of high ambient temperature, fine dust in the air, supply line surge and most important is maintenance free operation.
