

Let's focus on
better and smarter
use of energy.
Let's *Rise*
for Good

Ever committed to sustainability, we become the first Indian partner of EP100 - a new global campaign to promote energy productivity.

Under EP100, we have made a significant commitment to doubling our energy productivity by 2030 on a baseline of 2005, and hope to make a strong contribution towards achieving the climate goals agreed upon at COP21 - Paris Climate Agreement.
