

Energy saving motors and generators?

Absolutely.

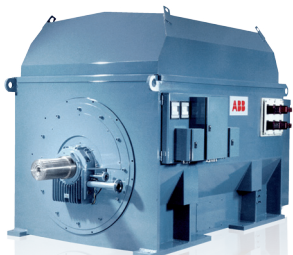

ABB has a long history of providing rotating power to the most demanding environments. Our commitment starts with a reliable design and lasts throughout the life of our motors and generators. Regardless of environment, we can offer high efficiency motors and money saving generators of all protection types. Our solutions enables major cuts in energy consumption as well as in CO<sub>2</sub> emissions at the same time as the manufacturing process is made more efficient and reliable with higher availability.
